

## Step 2: May/June – The Budget Council calculates Citywide priorities

### a) Calculating Citywide priorities

Themes Areas	Crime and CS	Social care	Children and families	Transport	Education	Housing	Leisure	Youth employment	Physical environment
Highton									
Easton									
Middlewood									
Low Hill									
Subtotal									
Score for all other wards ** ( <i>subtotal x 10</i> )									
Total for the City ( <i>Sum of above</i> )									

#### Notes:

We have been considering the priorities of four wards. These are in the first four rows above

\*\*There are 44 wards in total in Anytown. We don't have scores for 40 other wards, but the purpose of this experiment we can make these others up. We multiply the priorities we have by 10 and add them into the table

So we calculate the citywide priority by adding the totals together. We could use this to agree spend against each theme
